Inference Section

Sample Question:

All managers in the company are required to attend quarterly meetings. John is a manager. Based on this information, can we conclude that John attends quarterly meetings?

Answer:

- Yes. Since all managers are required to attend, and John is a manager, it logically follows that John attends the meetings.

Reasoning:

This is a straightforward inference based on a universal statement. The key is recognizing the universal requirement.

Recognition of Assumptions

Sample Question:

Statement: The new software update will improve productivity.

Assumption?

- a) Employees are willing to adopt the new software.
- b) The software update contains new features.
- c) Productivity is currently low.
- d) The update was implemented last month.

Answer:

- a) Employees' willingness to adopt is an unstated assumption necessary for the update to improve productivity.

Reasoning:

Without employee buy-in, the update may not lead to productivity gains, making this a critical unstated assumption.

Deduction

Sample Question:

If all staff who attend the training pass the exam, and Sarah attends the training, what can we deduce?

Answer:

- Sarah may pass or fail; the statement does not specify her outcome.
- Correct deduction: If Sarah attends the training, she may pass the exam, but it is not guaranteed.

Reasoning:

Deductive reasoning requires certainty; since the statement only states that those who attend pass, it does not specify individual outcomes.

Interpretation

Sample Question:

Data shows a 20% increase in sales after a new marketing campaign. Is it correct to interpret that the campaign caused the increase?

Answer:

- Not necessarily. Correlation does not imply causation. Other factors could have contributed.

Reasoning:

Interpreting data requires caution; further evidence is needed to establish causality.

Evaluation of Arguments

Sample Question:

Argument: Implementing flexible working hours will reduce employee stress because employees can choose when to work.

Is this a strong argument?

Answer:

- It can be considered a weak argument if it neglects other factors affecting stress, such as workload or home environment.

Strength of an argument depends on the supporting evidence and consideration of multiple factors.
