Historical Context:

Educational psychology has roots dating back to the late 19th and early 20th centuries, evolving through contributions from pioneers like John Dewey, Jean Piaget, Lev Vygotsky, and B.F. Skinner. Each of these thinkers introduced perspectives that continue to shape modern educational practices.

Core Theories and Models in Educational Psychology

Understanding the foundational theories provides insight into how learners acquire knowledge and skills. Here are some of the most influential models:

1. Cognitive Development Theories

- Jean Piaget's Stages of Cognitive Development: Piaget proposed four stages—sensorimotor, preoperational, concrete operational, and formal operational—each representing different capacities for thinking and reasoning. Recognizing these stages helps educators tailor instruction to developmental levels.
